

The Important of Nutrition Journal Publication

Saptawati Bardosono
Chief Editor for World Nutrition Journal

The rapid increase of nutrition journal publications indicate on how urge the problem in the world of nutrition. Research scientist has publish varies condition inter-related with the nutritional status and determined the cause of this problem.

Expanding populations, newly won national freedoms, and the urge for a better life in the developing countries of Asia, Africa, and Latin America, together with food surpluses, enlightened self-interest, and an awakened conscience in the more privileged countries of Europe, North America and Oceania have contributed to a resurgence of interest in the world health and nutrition problems.¹

Indonesian Nutrition Association (register as Perhimpunan Nutriti Indonesia), an association was build in 2011 has carried a vision an mision to continue and develop the work of late Dr. Iqbal Mustafa, MD, PhD, FCCM, he encouraged the evolution of multidisciplinary Critical Care Systems in developing countries to provide benefit for the greatest number of recipients at the lowest affordable cost. He's interest in Nutritional Support has become a foundation to INA.²

To continue his legacy, INA has support financially the continuation of Journal Critical Care and Shock, the dissemination of research to meet the needs of population.

Since to 2011, INA has taken an active role in all aspects of education and postgradutae trainings,

practices, researches, and publications in nutrition disciplines. The foster close collaboration among the professionals involved in nutrition disciplines.

The yearly event held by INA, Nutri Symposium has been running for 12 years. As part of this activity, we gather all participants to submit either oral nor poster prestation which will be publish as proceeding on the abstract.

The urge from nutrition researcher and scientist to join the Nutri Symposium as a platform to publish their work, has triggered INA to create an International Journal focus on Nutrition, named World Nutrition Journal.

Knowledge of nutrition; which includes community, clinical, and critical care nutrition, is constantly growing. Therefore, the needs of journal submissions and reference searches continue to increase. In this digital era, the web has greatly reduced the barriers for communicating scientific output.¹

One of many methods of publishing journals online is open access (OA). This is a method of publishing peer-reviewed journals and articles in the internet. This model of publishing can be freely accessed and read.² In Indonesia, there are still only few of open accessed journal publications, especially regarding nutrition-related knowledge. Considering the importance of journal publications, INA creates World Nutrition Journal as an open access journal for the

expansion of nutrition-related knowledge and acts as a media for authors to publish their researches.

World Nutrition Journal is the peer-reviewed, world scale scientific journal of community, clinical, and critical care nutrition. It is the official journal of Indonesian Nutrition Association. As a brand new journal, WNJ's team has a workload to accomplish to achieve a standard specification for an International Journal. Recently, WNJ has been register online ISSN for LIPI (Lembaga Ilmu Pengetahuan Indonesia), and as a member of Crosref for Metadata and Similiraty Check In. Our goal is publish a high standar articles and able to track and cited by International sicientist as well as being index in Scopus. Scopus is a bibliographic database containing abstracts and citations for academic journal articles.

We do realize our first issue of World Nutriton Journal is a starting point to develop our journal to be more credible and having an impact factor is in one of our targets among many.

We will start to polish and set our targets to be fulfill for our next edition.
